

## UNSDI Project: Deliverables

1. In partnership with UNDP Resident Coordinators and UN in-country presences: in "One UN" Pilot Countries support the establishment of national capacity for SDI-enabled publishing national data to the internet for the benefit of in-country coordination of UN activities
2. In collaboration with interested members, and also in collaboration with peer bodies such as OGC and the GSDI: support authoring of and publishing for the benefit of UN bodies, member states, NGO and IGOs a series of of governance and policy guidelines, best practices and technical implementation cookbooks for establishing and implementing national, regional and sectoral SDIs

## Internal UNEP Activities contributing to UNSDI initiative:

3. UNEP will work with national environment authorities in "One UN" pilot countries to implement national capacity for SDI-enabled publishing national to the internet for the benefit improved national environment assessment and reporting, and for participation on international coordination activities such as GEOSS and the management of the World Database on Protected Areas
4. UNEP will continue to work with regional partners to mature the SDI-East Africa initiative for hand-off to one or more competent regional authority by end of 2009, supporting development of institutional capacity where appropriate
5. UNEP will contribute reference layers to the One UN layer on Google Earth, specifically the World Database on Protected Areas
